It is glitchy and the game mechanics are wrong. if you double down, it triples down, and you only get money for a double down (wich woulda just been a hit) and if you loose, you can go into negative money? the overall quality of the game is bad. you can find better free blackjack flash games on the internet.

TLDR : dont buy, it is a really bad and simple game.. 60% resources of gtx1080, are u kiddin' me?
